

ICIIS special session on **Flexibility in Smart Grid**

Lanka Electricity Company (Pvt) Ltd. (LECO), in collaboration with the University of Peradeniya is organizing a special session in International Conference on Industrial and Information Systems (ICIIS) to educate professionals and enthusiasts about usage of modern smart grid technology for distribution sector improvement.

"Smart Grid Concept for improving Power Quality, Reliability & Adaptability"

- ✓ Smart Grid – Present and Future
- ✓ Power Electronics revolution in the electricity supply industry
- ✓ The role of Microgrid for system operation supports
- ✓ Microgrid Stochastic optimal control
- ✓ Smart grid initiative in Taiwan and Distributed control scheme for enhancing distribution network self-healing capability
- ✓ Japanese future grid and role of renewable forecasting on its Planning and Operation
- ✓ Bad data detection using nonlinear measurement residual

on 14th DEC. 2017
at OZO, Colombo
from 9.00 a.m to 5.00 p.m

Confirm your participation to Dasun
(dasun.ranasinghe@leco.lk, 0710852309) on or before
11th of December for registration.
